  - H: 2¾” (7.4 cm) (not including handset)
Weight: 5 lbs. (2.3 kg)
Certification: UL 1069

Description

The Rauland NCS3010 Nurse Console is the operating center for each facility floor or area served by the Responder® System 3000. All patient or other internal communications are channeled through this station whose operator is able to respond quickly to each call and instantly initiate appropriate action. The Nurse Console provides the operator with full information concerning incoming calls and their priority, status of calls in memory, location of staff members, etc.

The Nurse Console also permits the operator to initiate calls to any room or station location; program priority status for each patient; locate staff at pre-set location(s); make paging announcements to one or more areas or facility-wide.

Architects and Engineers Specifications available on disk. Specifications subject to change without notice.
